Oh you are talking about her. Well I made enough on my writing in one year to buy a yacht and restore it- and have money left over. And that will be my office for more writing gigs **#OBX**. AND I get to be a normal American and be happy with lots of Alpha men around. So, I'm good.

Because places like Media Matters freaked out so much over my article- that President Trump retweeted- I made enough money to buy a Yacht!

That is a true story thanks Media Matters! I made more money off that one article than some people make in year!
